

C\_split

```
graph LR; C_split[C_split] --> get_minbucket[get_minbucket]; C_split --> get_minprob[get_minprob]; C_split --> get_tol[get_tol];
```

A diagram illustrating the structure of the C\_split function. A central black box labeled 'C\_split' has three blue arrows pointing to three separate white boxes. The top box is labeled 'get\_minbucket', the middle box is labeled 'get\_minprob', and the bottom box is labeled 'get\_tol'.
